

We're helping to save local lives by supporting

RAISING MONEY FOR A SECOND SOLAR POWERED DEFIBRILLATOR CABINET IN [[LOCATION]]

We're raising money for a Superbin for [[LOCATION]] - a solar powered defibrillator cabinet that can be located literally anywhere. Statistics show that if a defibrillator is used and CPR performed within 3 - 5 minutes of cardiac arrest, the chance of survival increases to 74%. Help us to save more local lives.

How to get involved and support:

- Get confident on how to do CPR and what to do in an emergency
- Support us by spreading the word to others
- Donate to raise money for our second village defib
- Join us at the [[VENUE]] for our charity fundraising night
- Complete a run, bake sale or a fun fundraising campaign to support us
- If you or someone you know own or run a business - sponsor the new cabinet or donate an auction prize
- Look for other local locations and business estates that may need a defib to save someone's life in an emergency
